# The **Ultimate** Municipal Customer Service Experience

Muni is an AI-powered resident relationship, request, and engagement management platform built for municipalities.

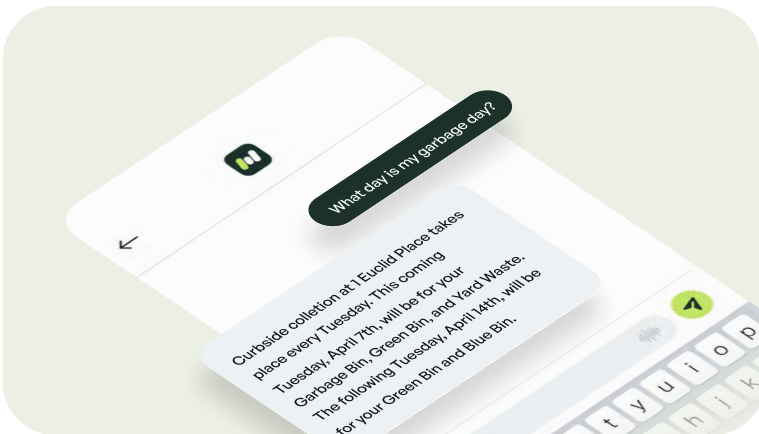

# About Us

## **august**

August is a digital agency based in Toronto. Our team of 19 designers and developers builds websites, web apps, and mobile apps for startup, enterprise, and government clients.

## **muni**

Muni was launched by August in 2023 and has full access to the agency's extensive capacity to build, scale, and support as required.

August launched Muni to bring its experience in designing and developing  
CRMs and AI-enabled user experiences to the public sector.

# Benefits Of An **AI-powered** Conversational Interface

You can think of Muni as the ultimate customer service representative, immediately available 24/7, and with full and perfect information across all relevant domains.

01

## Residents

Access to all municipal information and services

Familiar and intuitive

Regularly improving

02

## Municipalities

A centralized platform to manage and track all interactions with residents

Dramatically reduce call volume

Flexible and adaptive

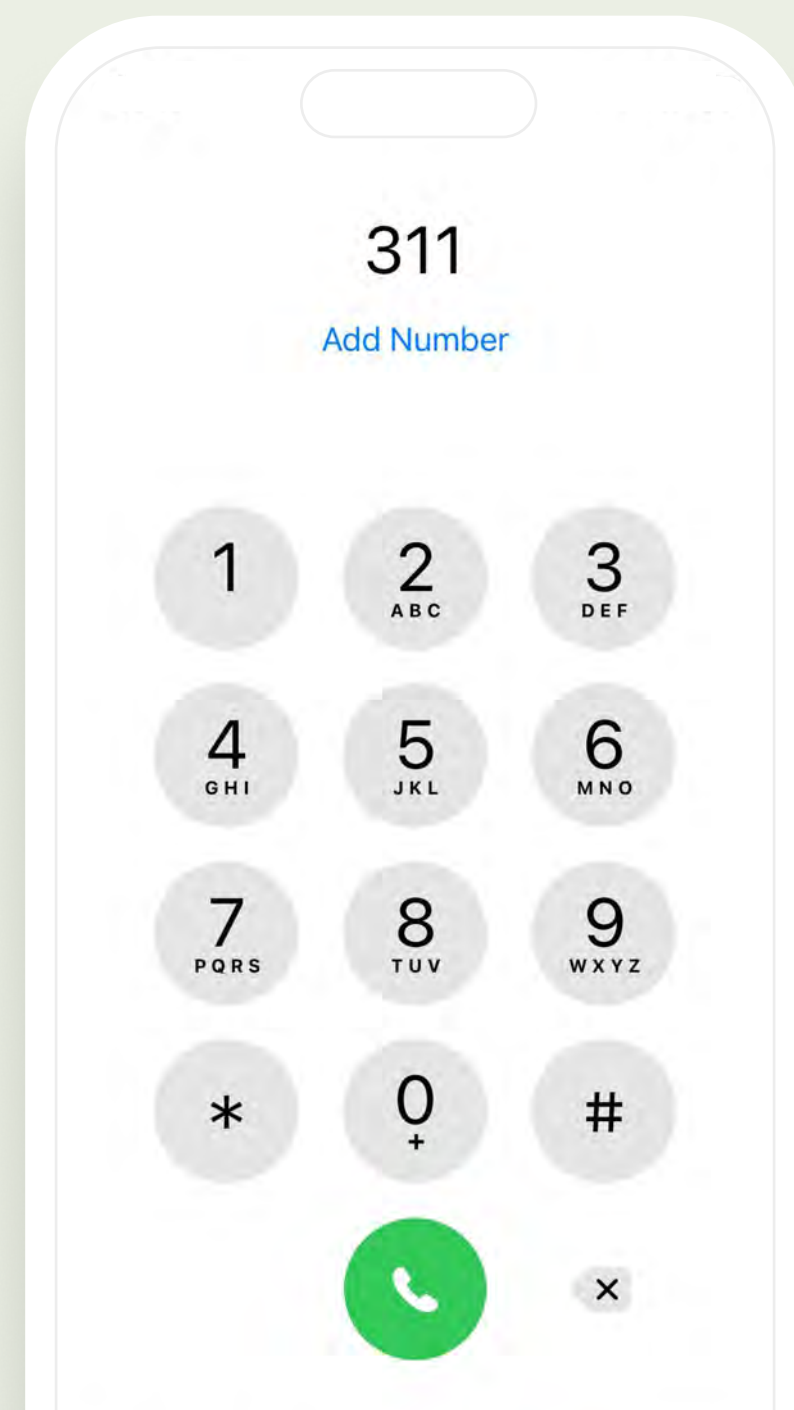

# Transformation

Most municipalities don't provide any 311 service at all. Of those that do, most rely on email and phone calls to manage communication. A few have introduced mobile apps. We're taking those a giant step forward.

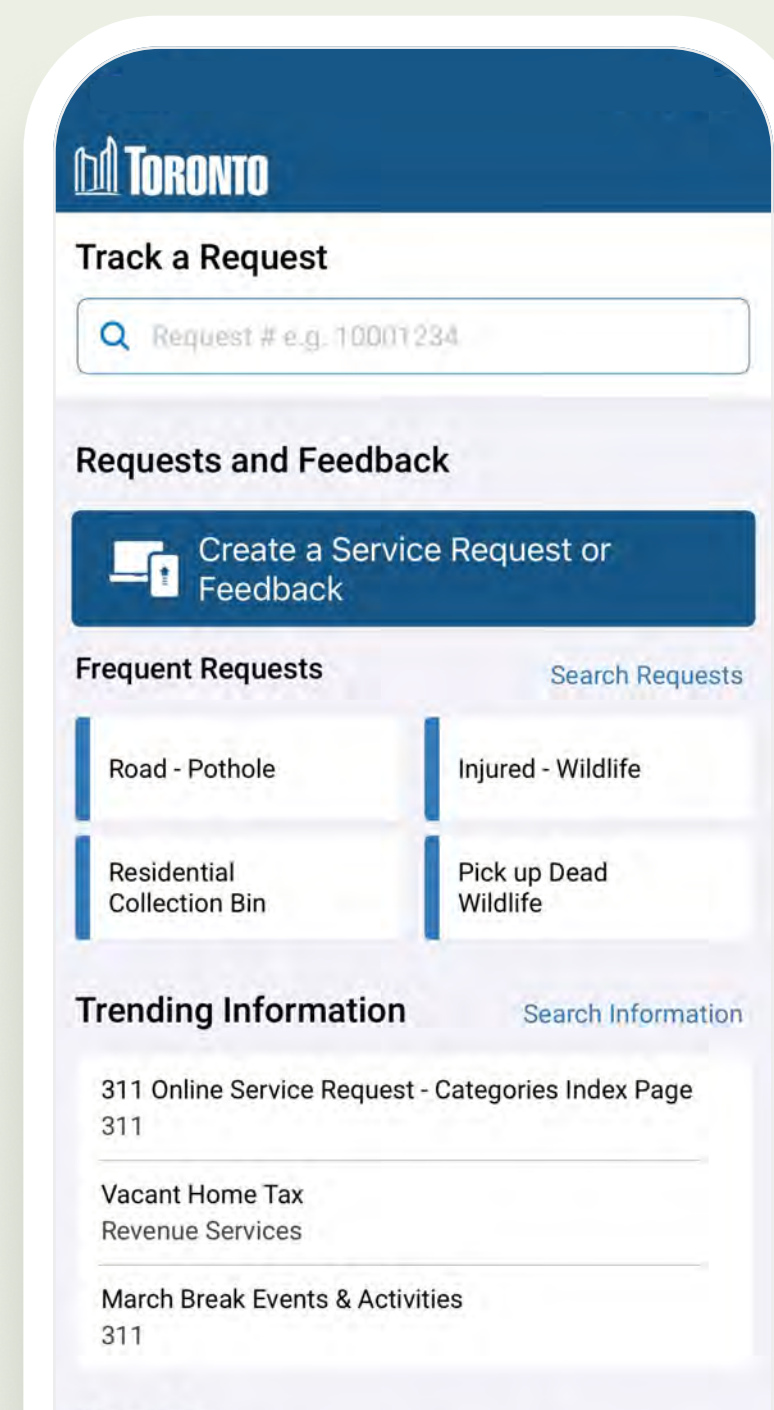

## First generation

Call centre

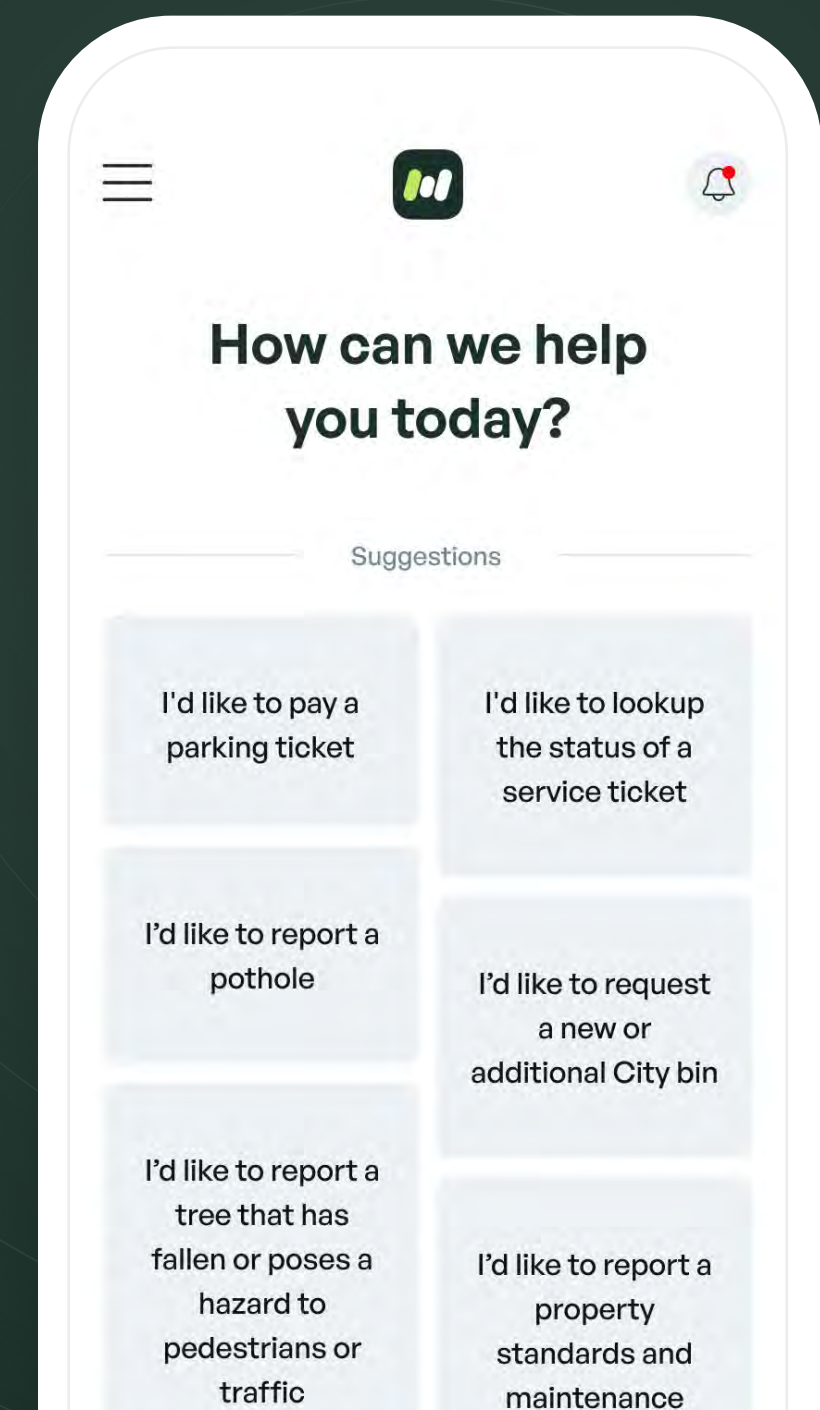

## Second generation

Mobile application

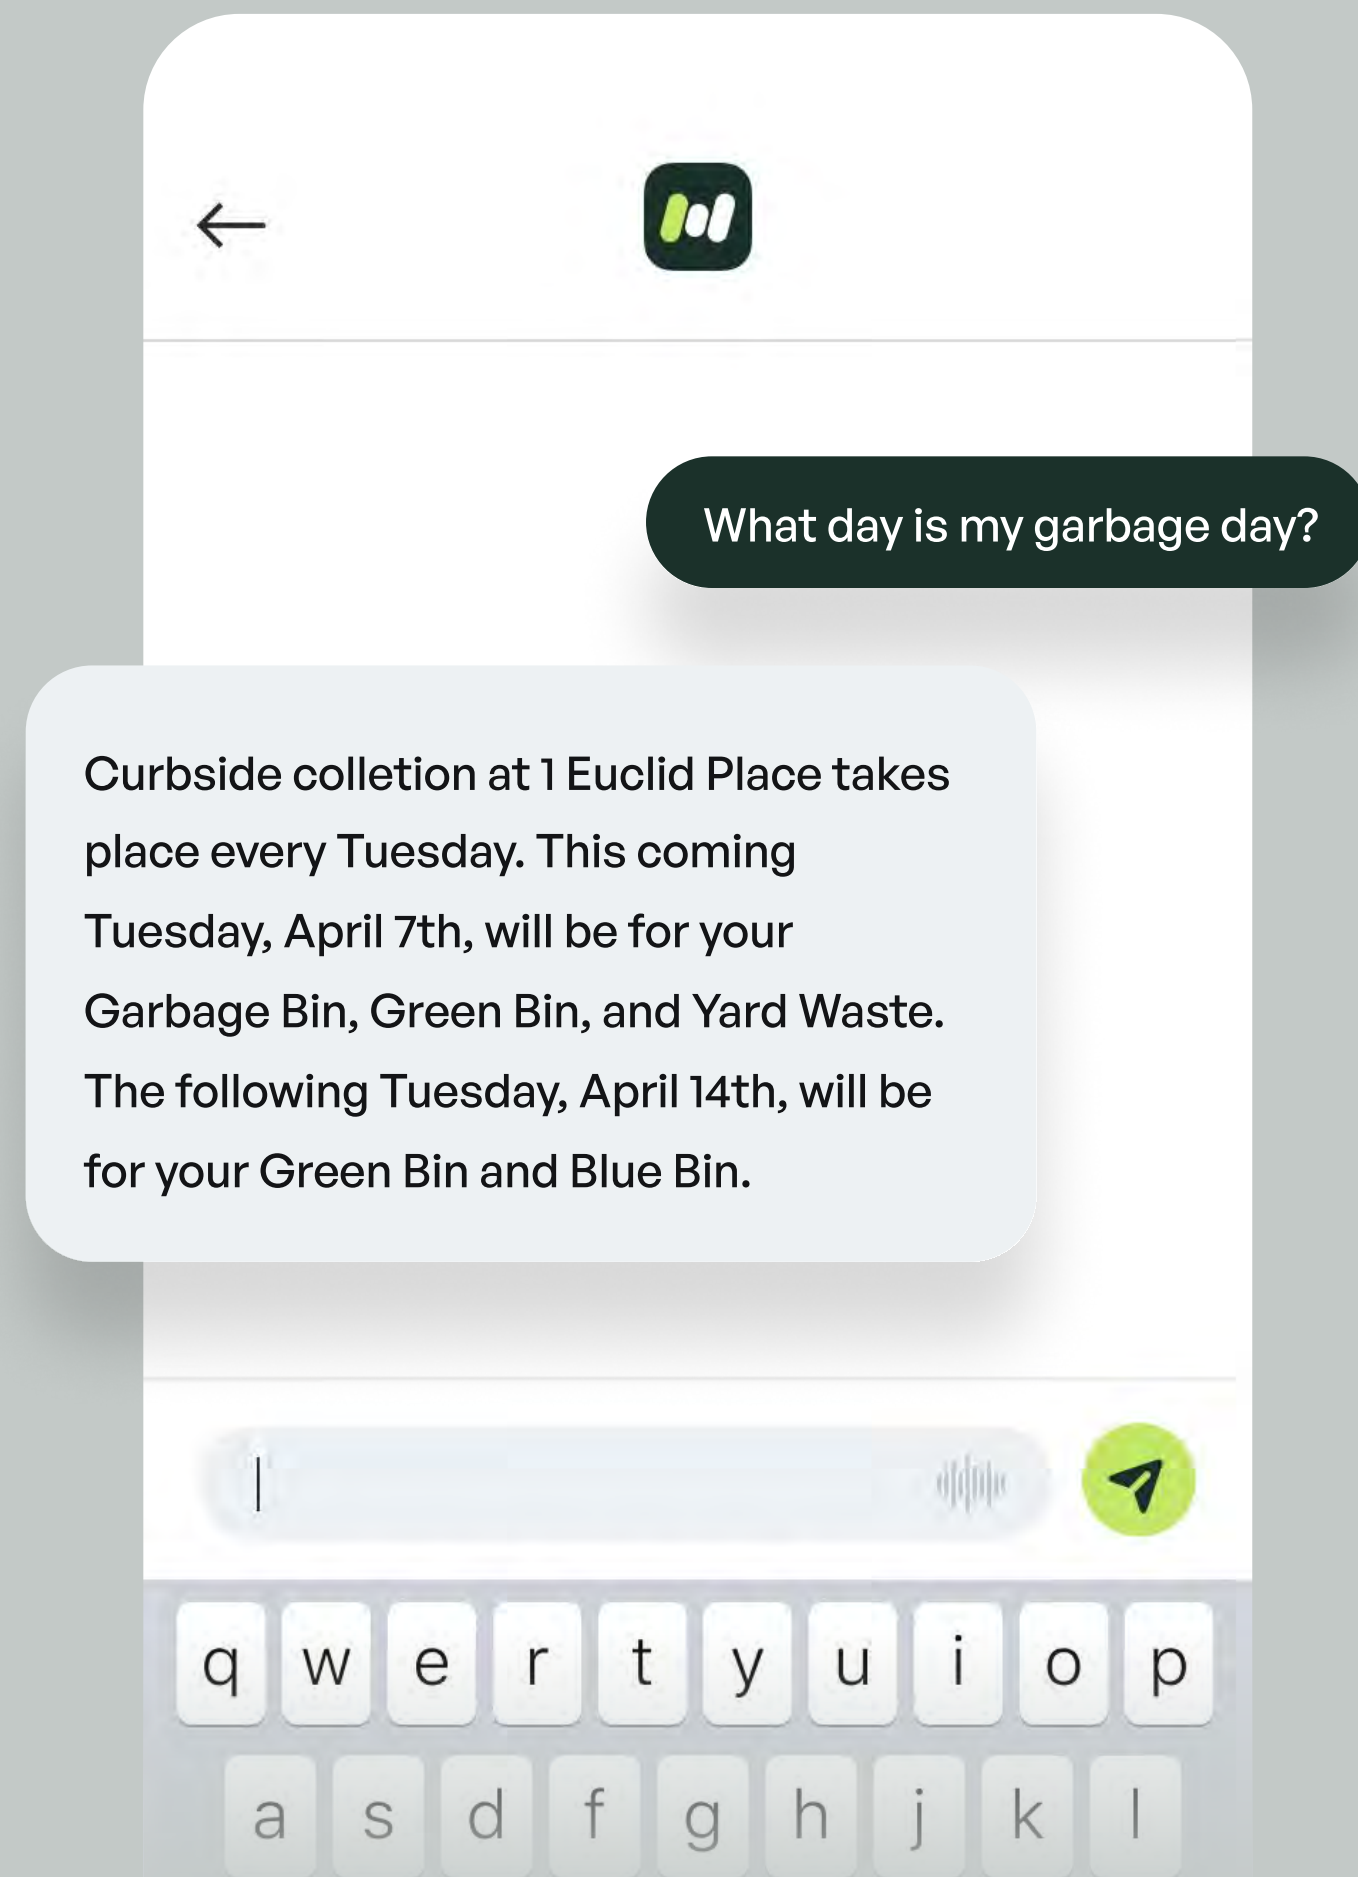

## Third generation

Smart (AI) live agent

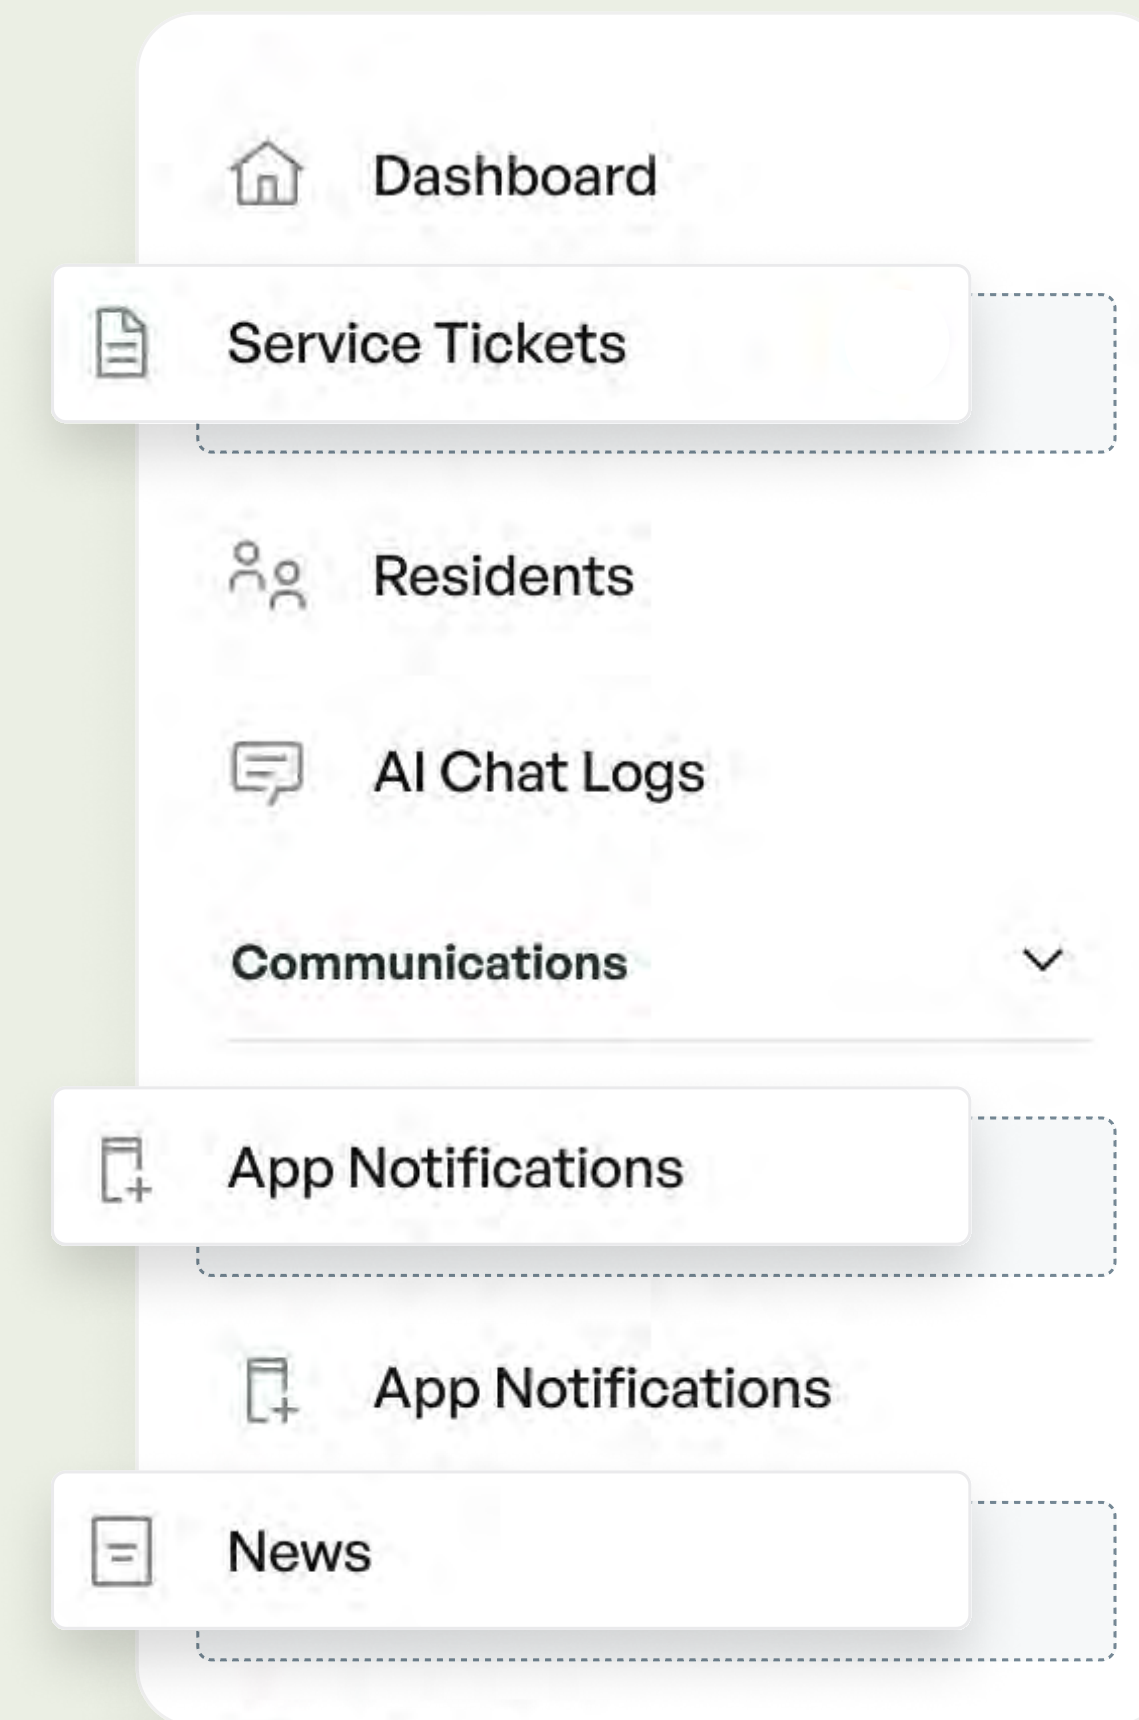

# Conversational Chat Interface

Think of Muni as your ultimate 24/7 customer service representative, ready to assist with a wealth of knowledge spanning all relevant domains. With access to full and perfect information, our intelligent chatbot ensures accurate responses and solutions, making interactions effortless and efficient. Whether it's day or night, Muni is there to provide immediate and reliable support, helping your residents save valuable time and effort.

# Modularity At Its Core

Muni has been designed and developed with modularity at its core, offering an ‘a la carte’ approach to product feature selection meaning municipalities have the flexibility to tailor the solution precisely to their needs. Our commitment to seamless integration with existing systems ensures that Muni complements rather than disrupts any any current infrastructure or work flows. Whether choosing to incorporate individual features or adopt the entire platform, Muni is a versatile partner in enhancing and extending the operational capabilities for all municipalities.

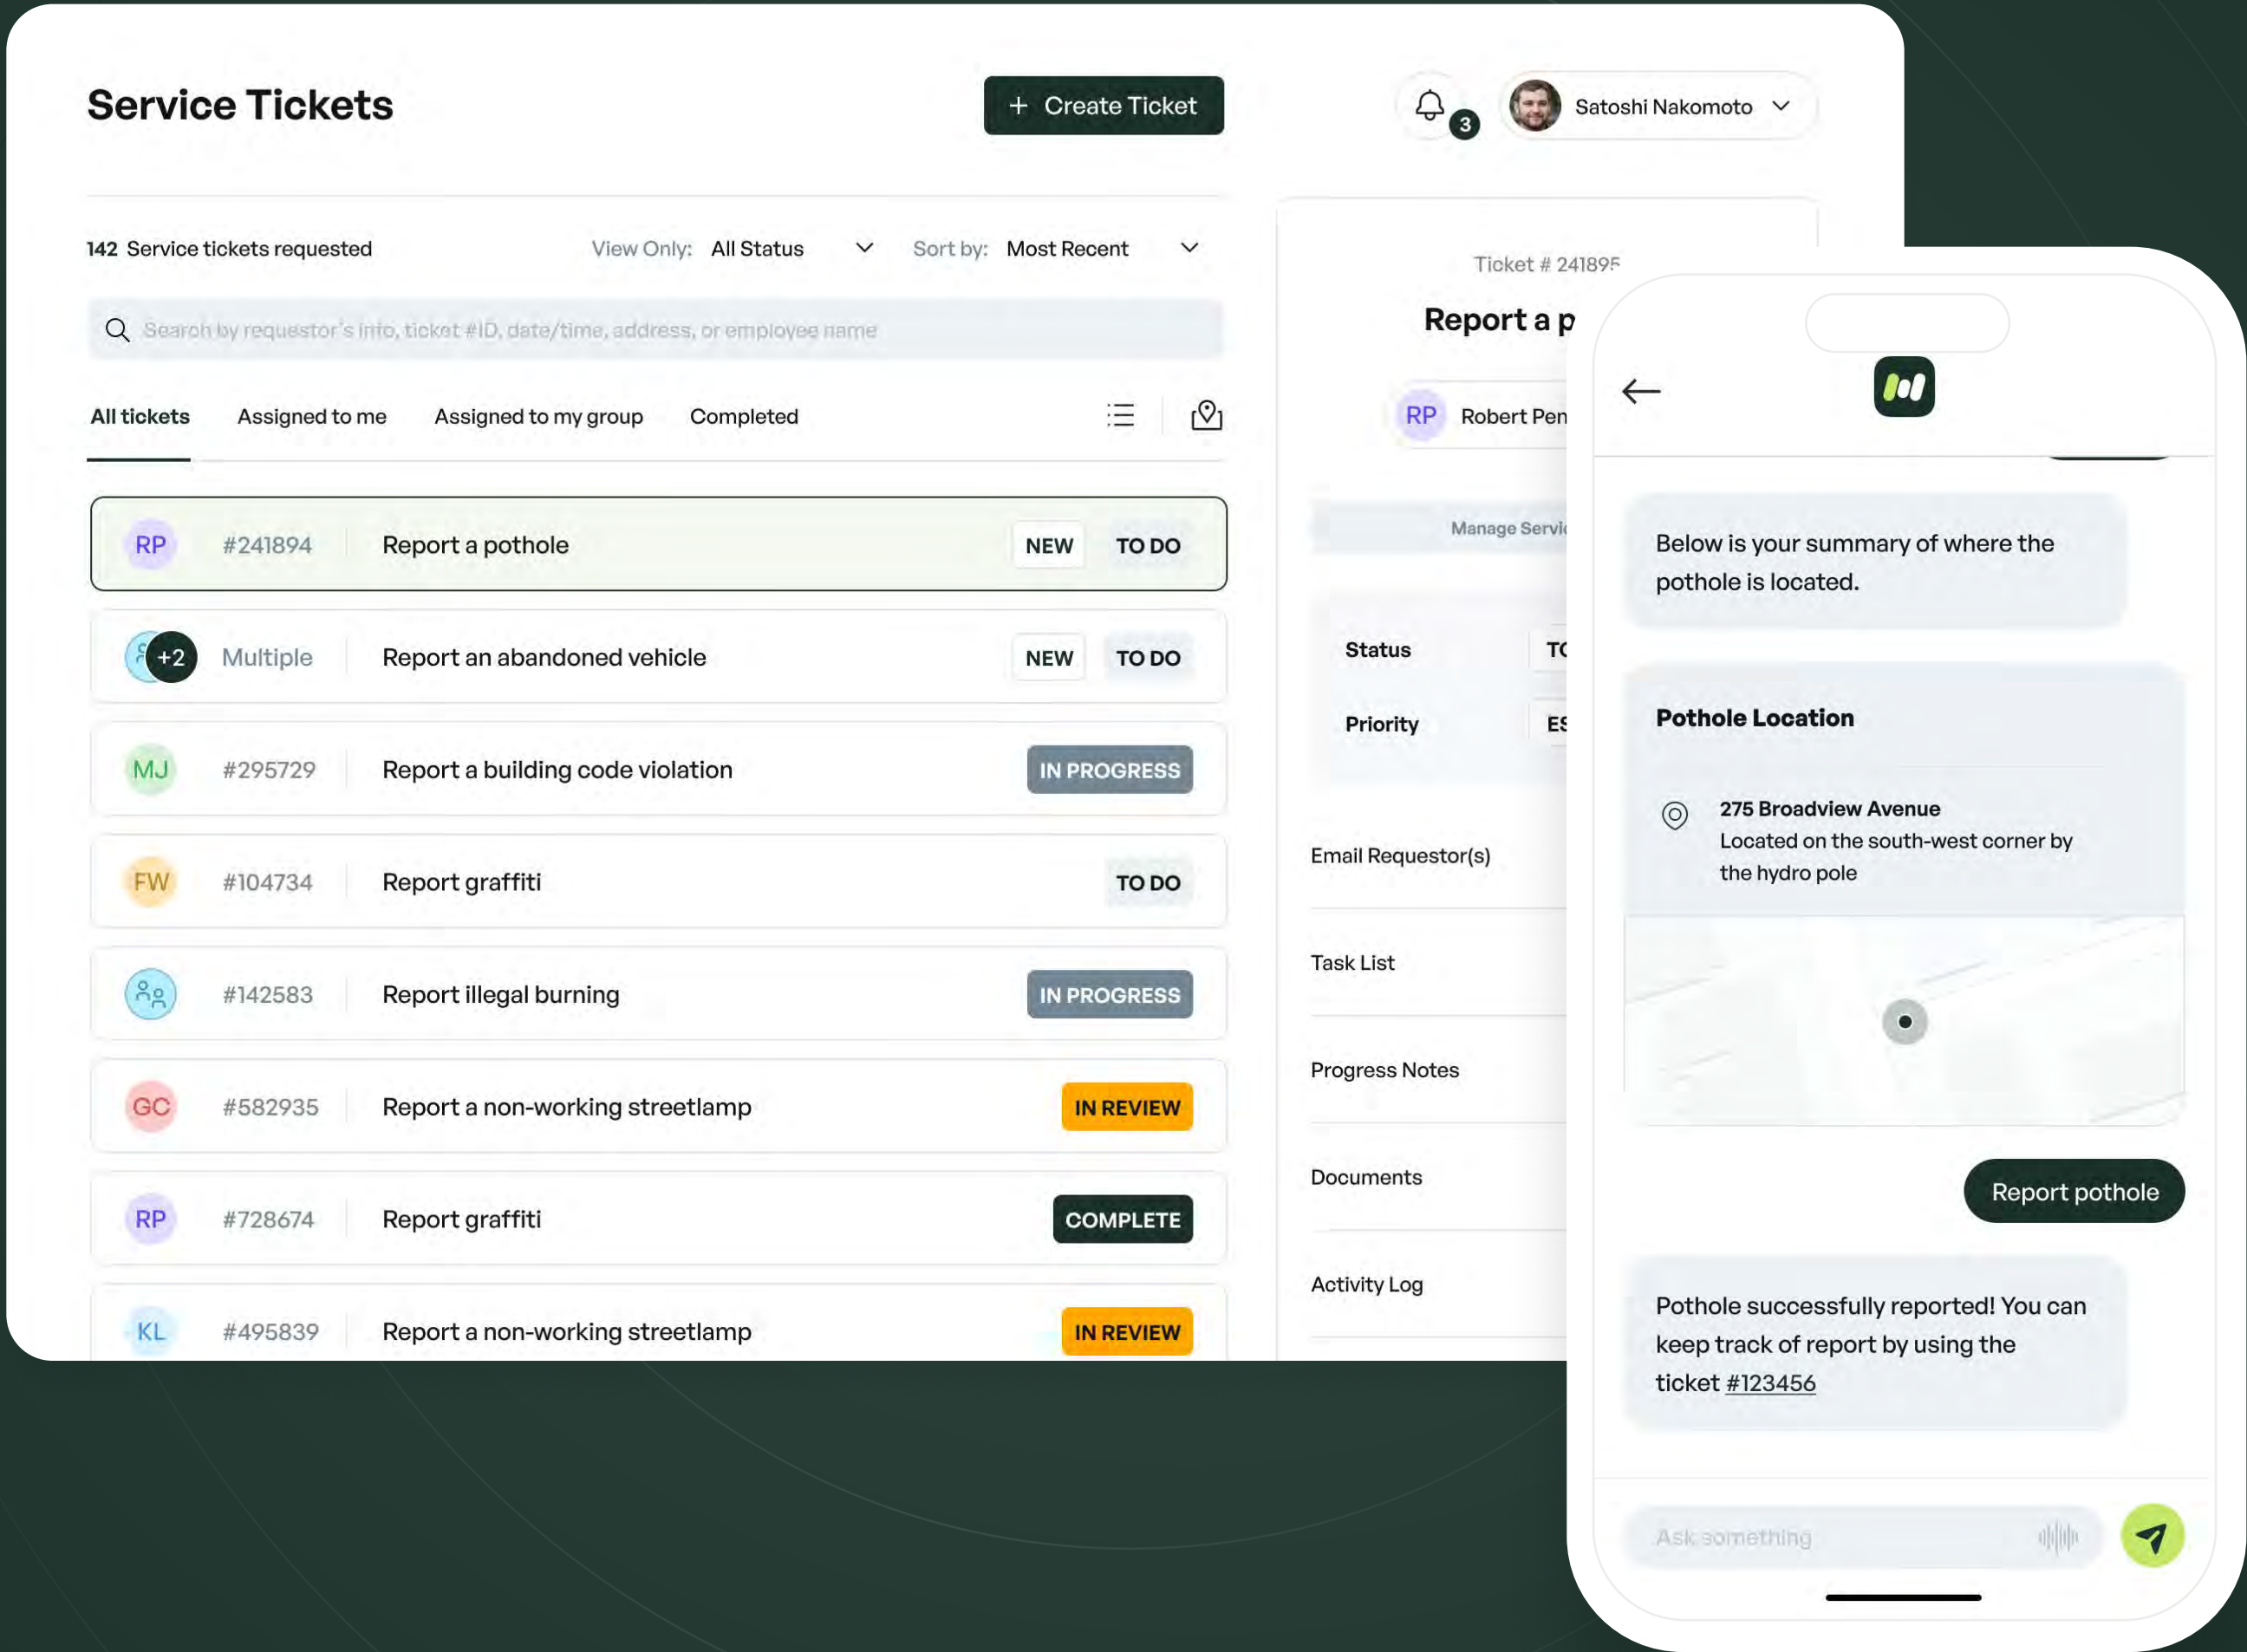

Municipal Services

# Service Requests

Service requests generated within the app by residents are sent to the Admin dashboard as tickets with the appropriate information attached to them. Administrators can then address them by assigning them to the appropriate party and change the status based on where they sit in the resolution flow.

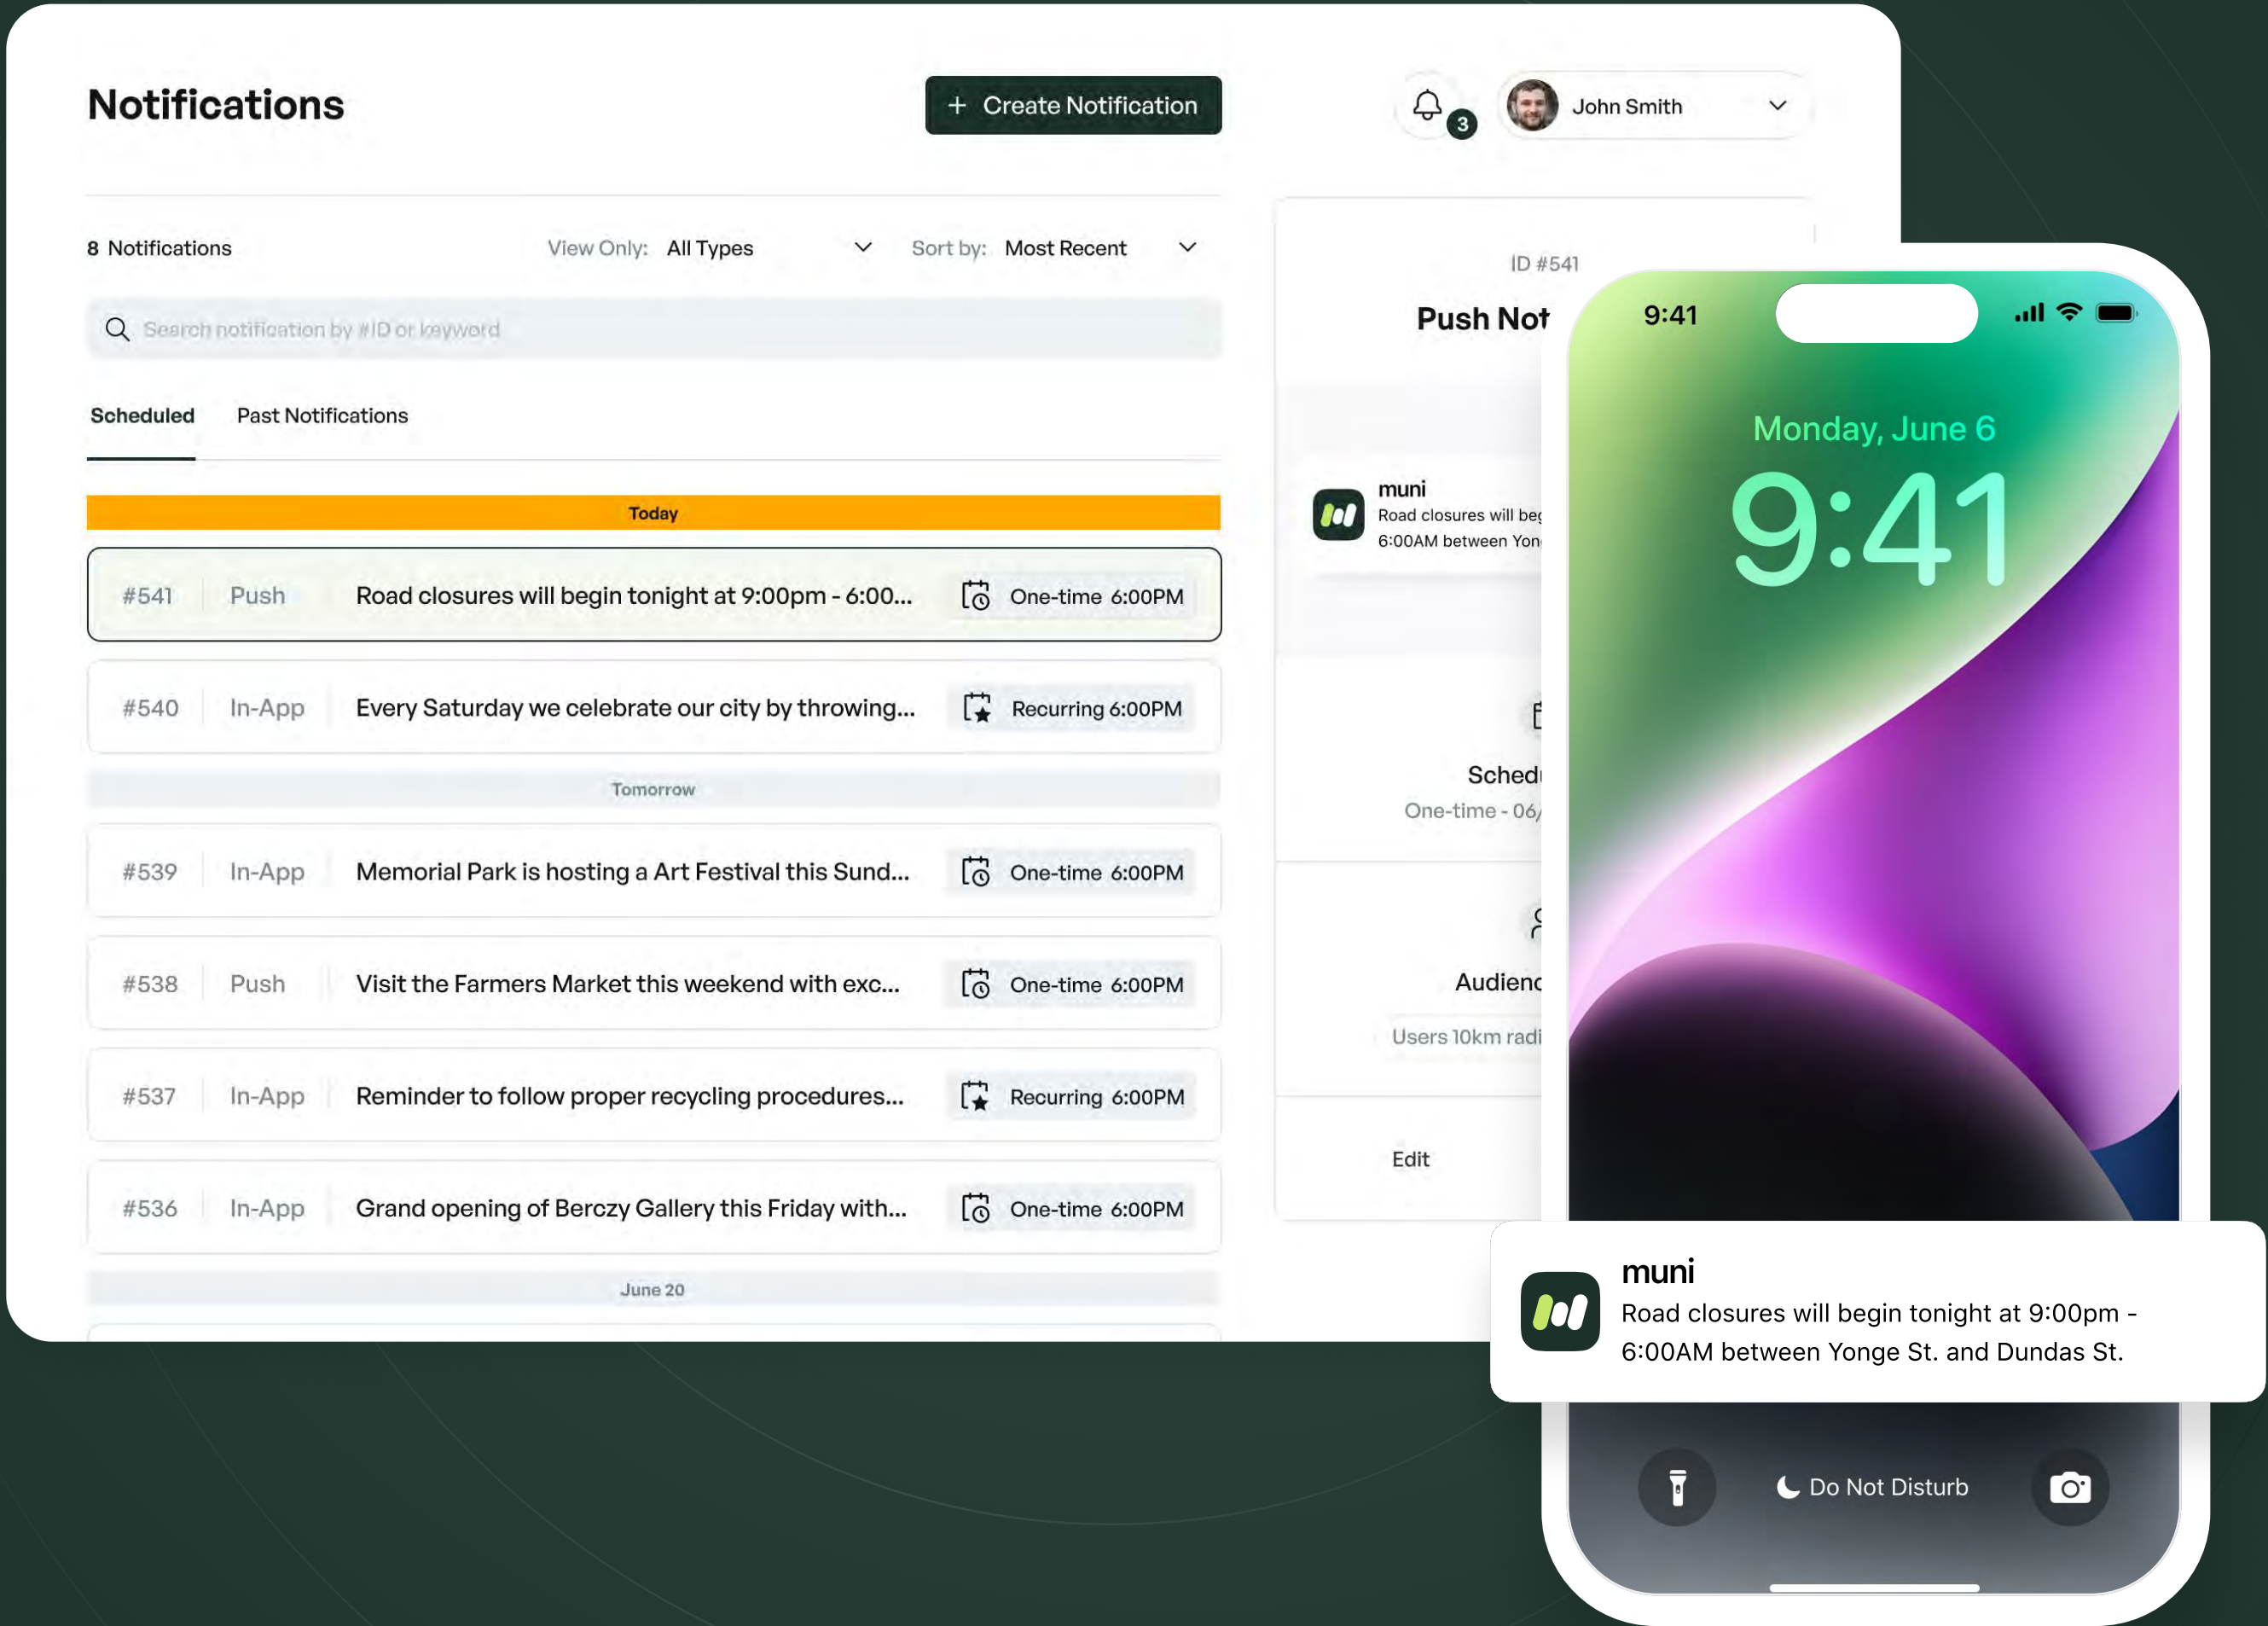

Municipal Services

# Notifications

Administrators can send push notifications to residents through the app. These can be scheduled, recurring, and/or one-time notifications. This provides administrators the flexibility to communicate with residents seamlessly.

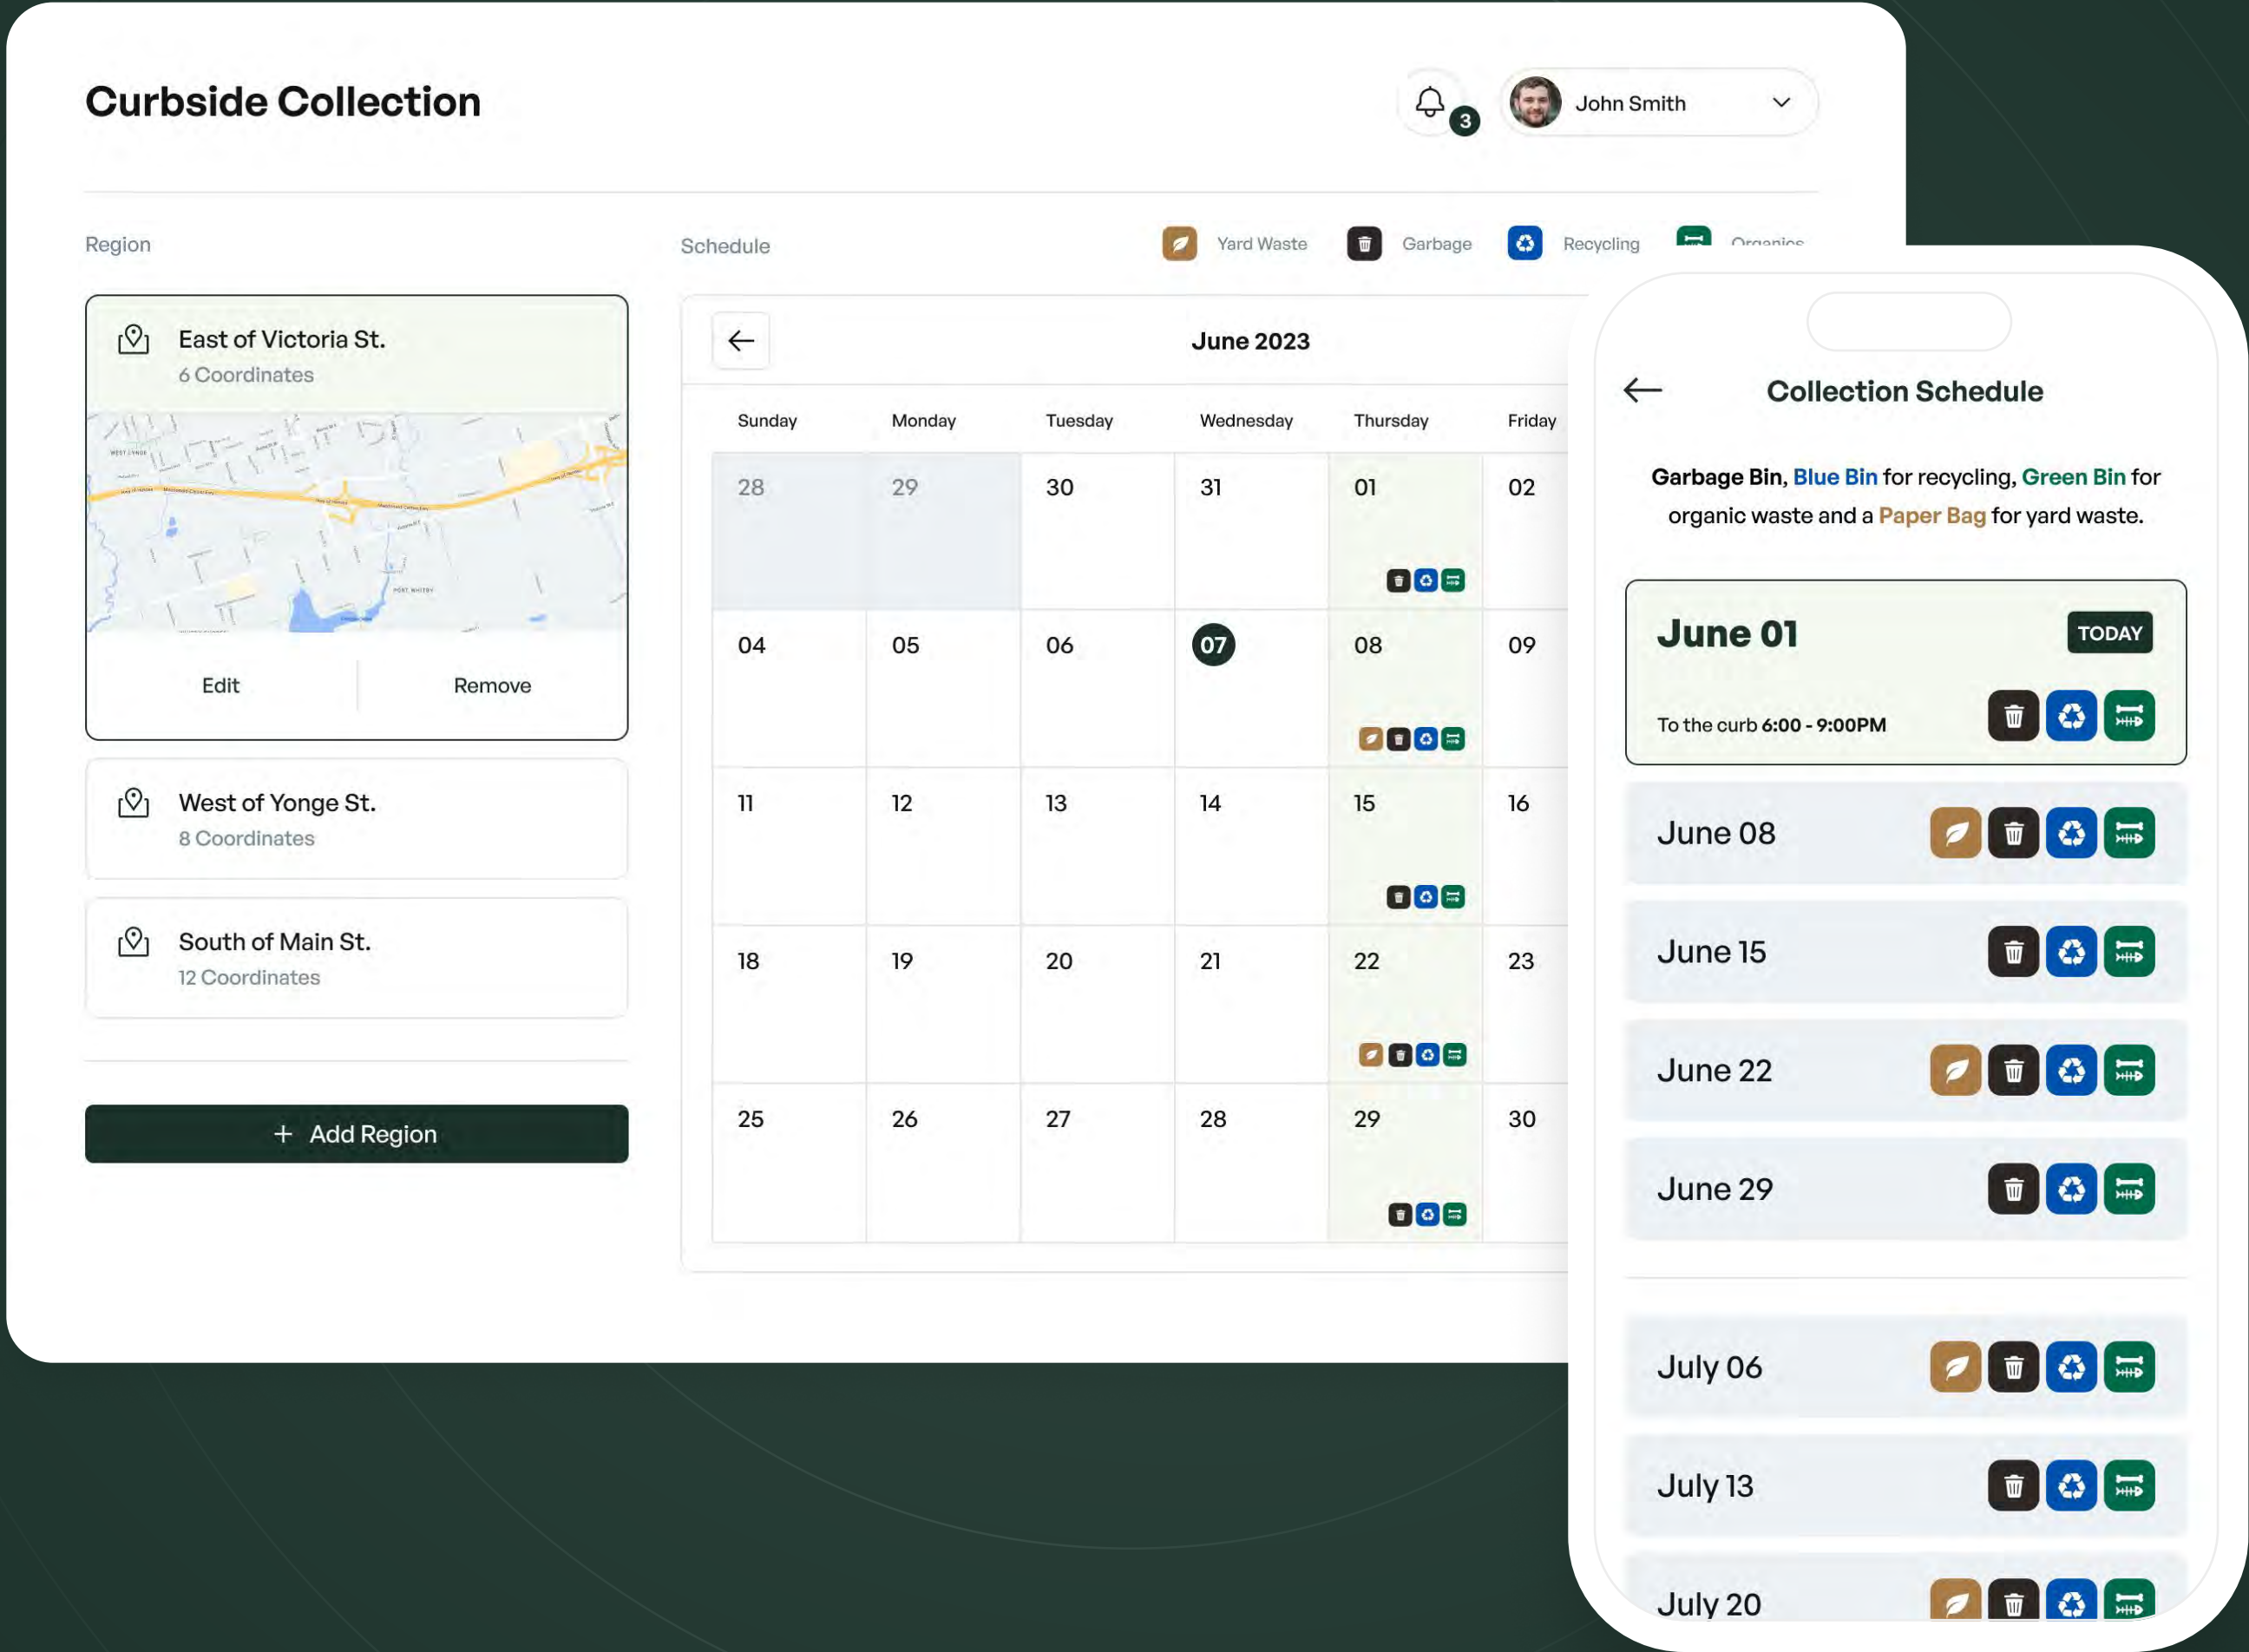

Municipal Services

# Curbside Collection

The Admin dashboard allows administrators to create a curbside collection schedule for different zones of their municipality. That schedule is then made visible to residents so that they know when different bins will be picked up throughout the week.

## Municipal Services

# Payments

The Muni app allows residents to process payments for parking violations, municipal taxes, utility fees, program fees, and more. For municipalities that already have a payments system in place, Muni can seamlessly integrate with existing systems, providing flexibility and convenience for all.

The image shows a mobile app interface for a parking violation payment. At the top, there is a back arrow and the Muni logo. Below this is a section titled "Parking Violation Information" which displays a document icon, the text "PH388516 - Outstanding", the due date "Due date: 2023 March 5", and the amount "\$50.00". A question "What would you like to do next?" is followed by a "Pay amount due" button. Below this is a progress bar with three steps: "Contact", "Payment" (which is the active step), and "Billing". Under the "Payment" step, there is a "Credit Card" section with a "Scan" button and a camera icon. The credit card details include a "Credit card number" field with VISA, Mastercard, and American Express logos, an "Exp Date" field with a "MM/YY" format, and a "CVC" field with a "3 Digit #" format. At the bottom, there are two buttons: "Continue to Billing" and "Back to chat".

Municipal Services

# Knowledge Base

The Admin dashboard allows administrators to add information about various points and interest and venues such as police station, city hall, etc. This information is then used by the AI model to respond to user queries.

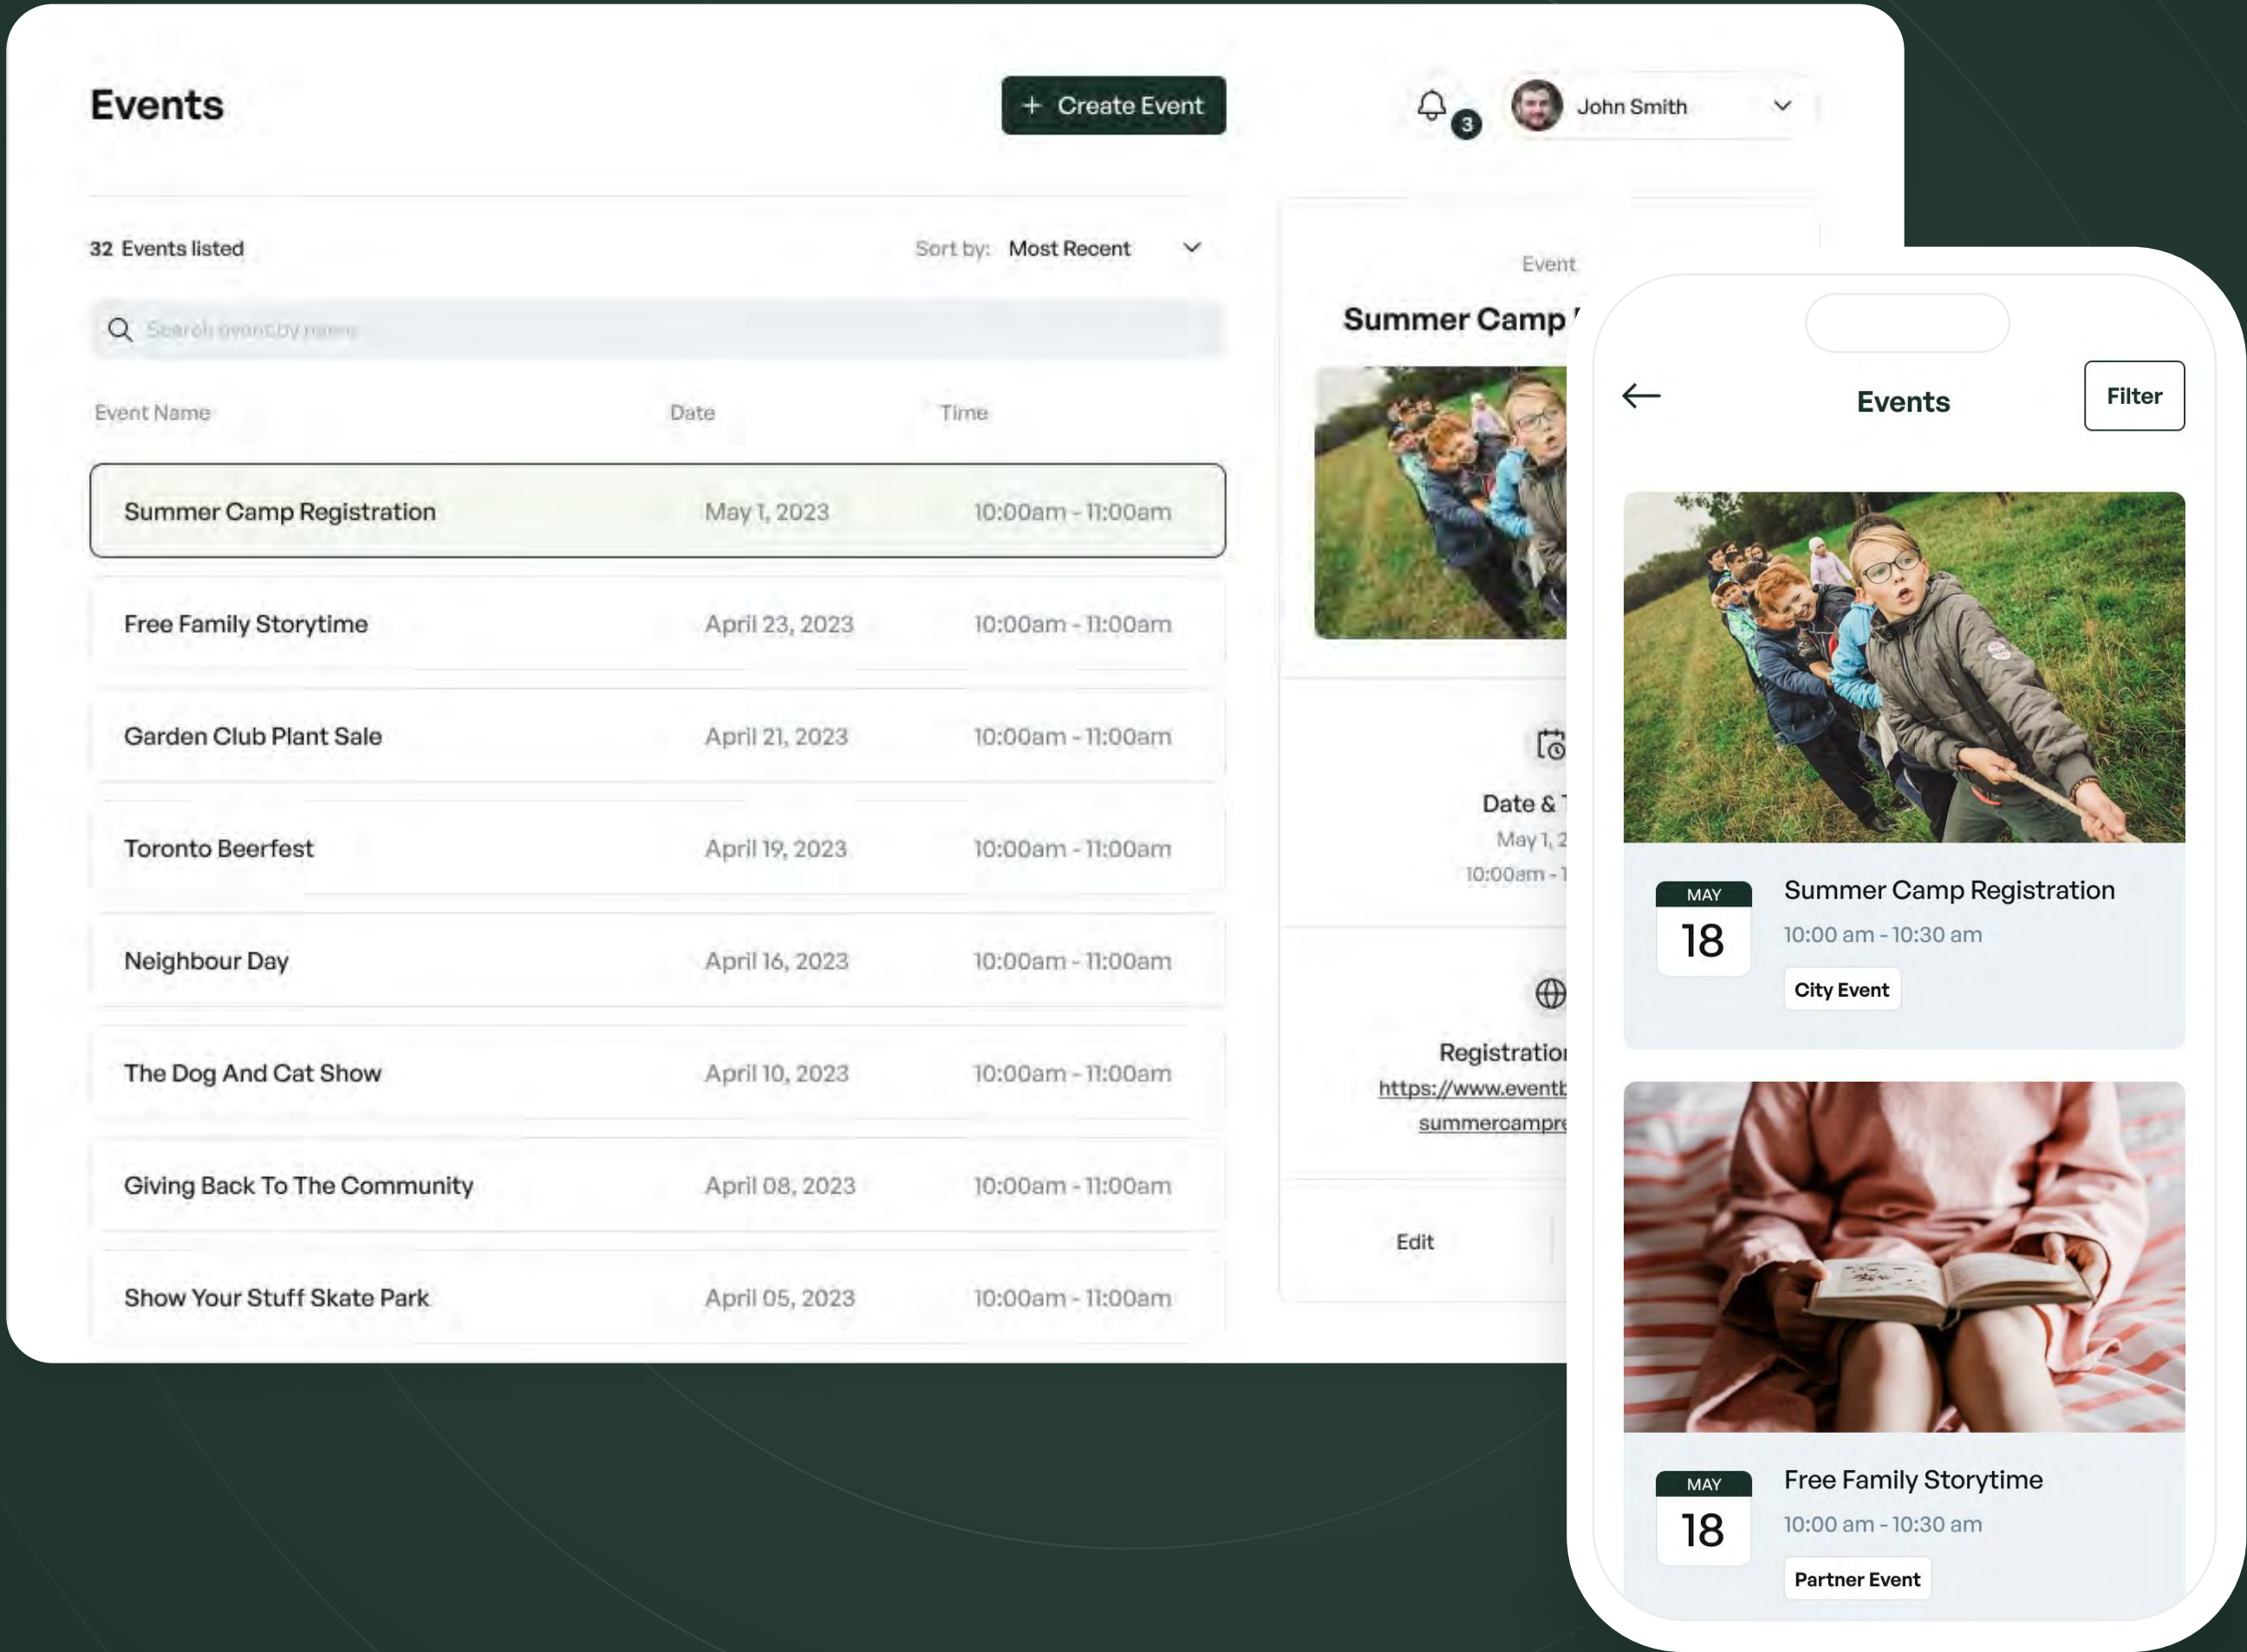

Municipal Services

# Event and Activities

Muni’s Events and Activities feature keeps residents informed about upcoming events and activities in their community. Whether it's a local festival, town hall meeting, or a neighborhood cleanup, residents can easily access all relevant details and updates through the app. This feature ensures that residents never miss out on important community happenings, fostering greater engagement and participation.

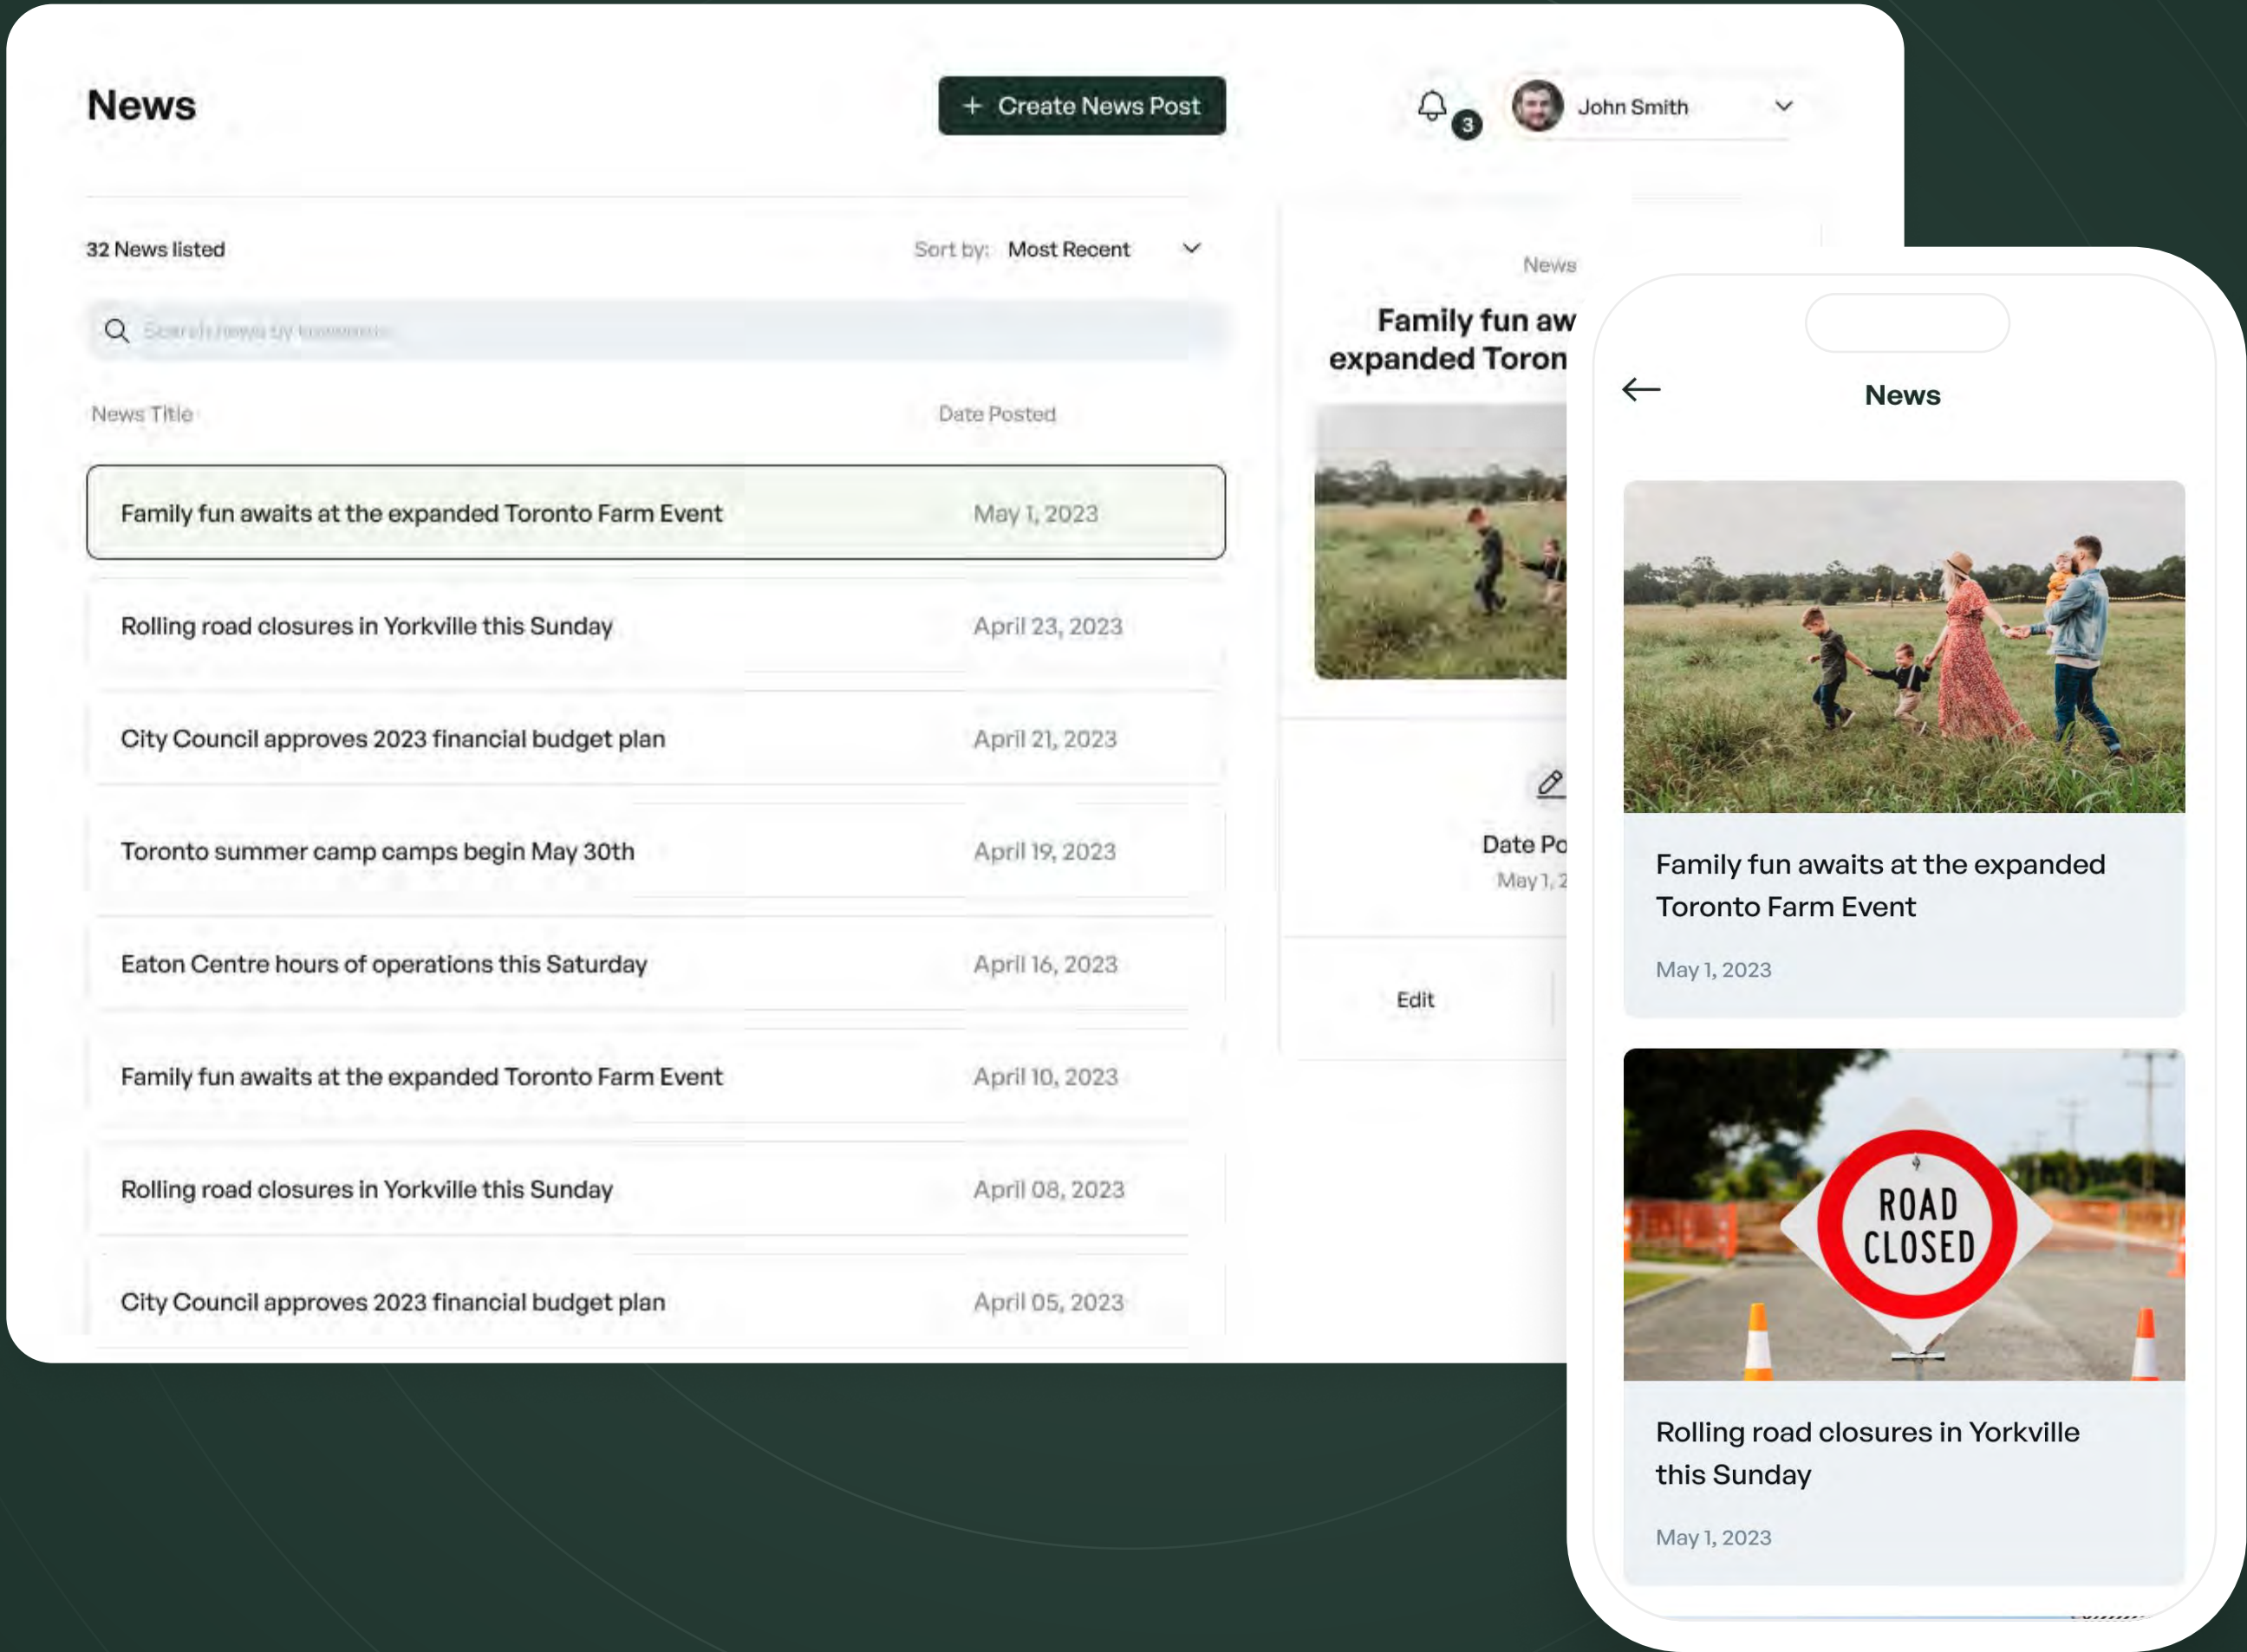

Municipal Services

# News and Announcements

Keep your residents in the loop with Muni’s News and Announcements feature. This allows municipalities to share timely and relevant news, ensuring that residents are always informed about what’s happening in their community. From policy changes to emergency alerts, this feature is designed to deliver critical information efficiently and effectively.

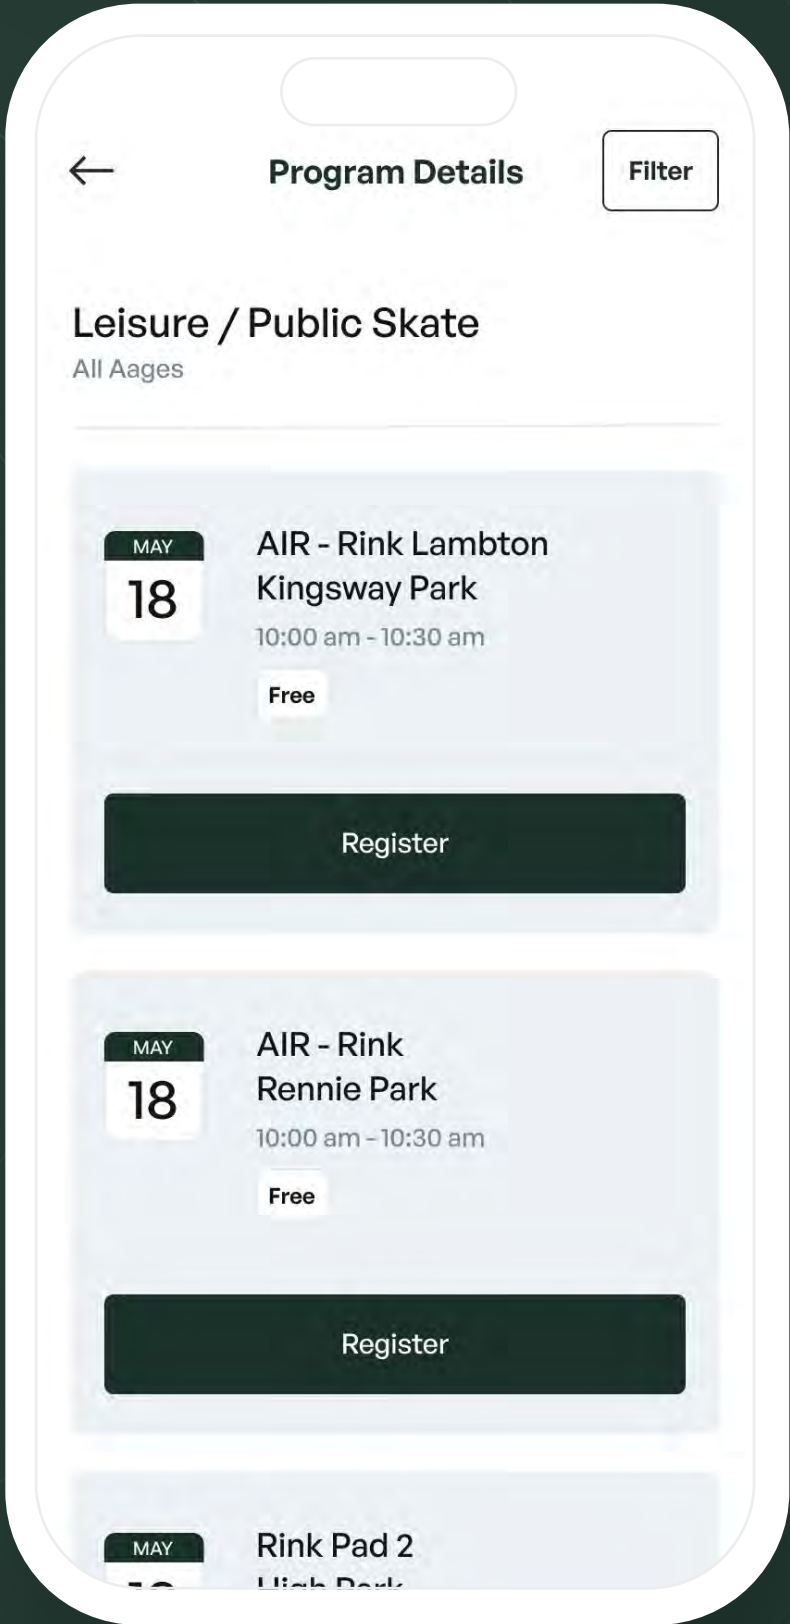

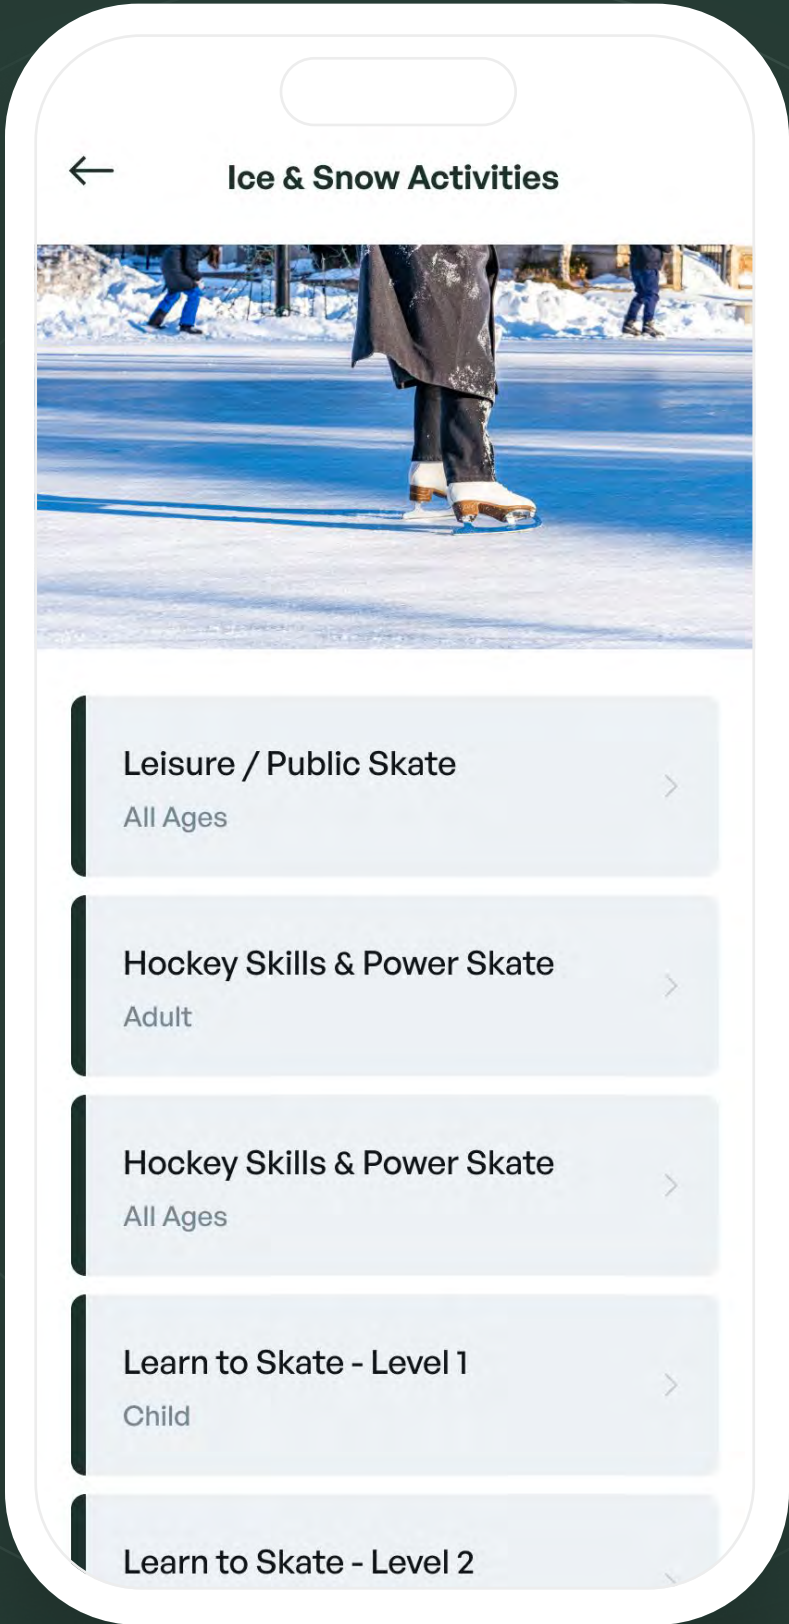

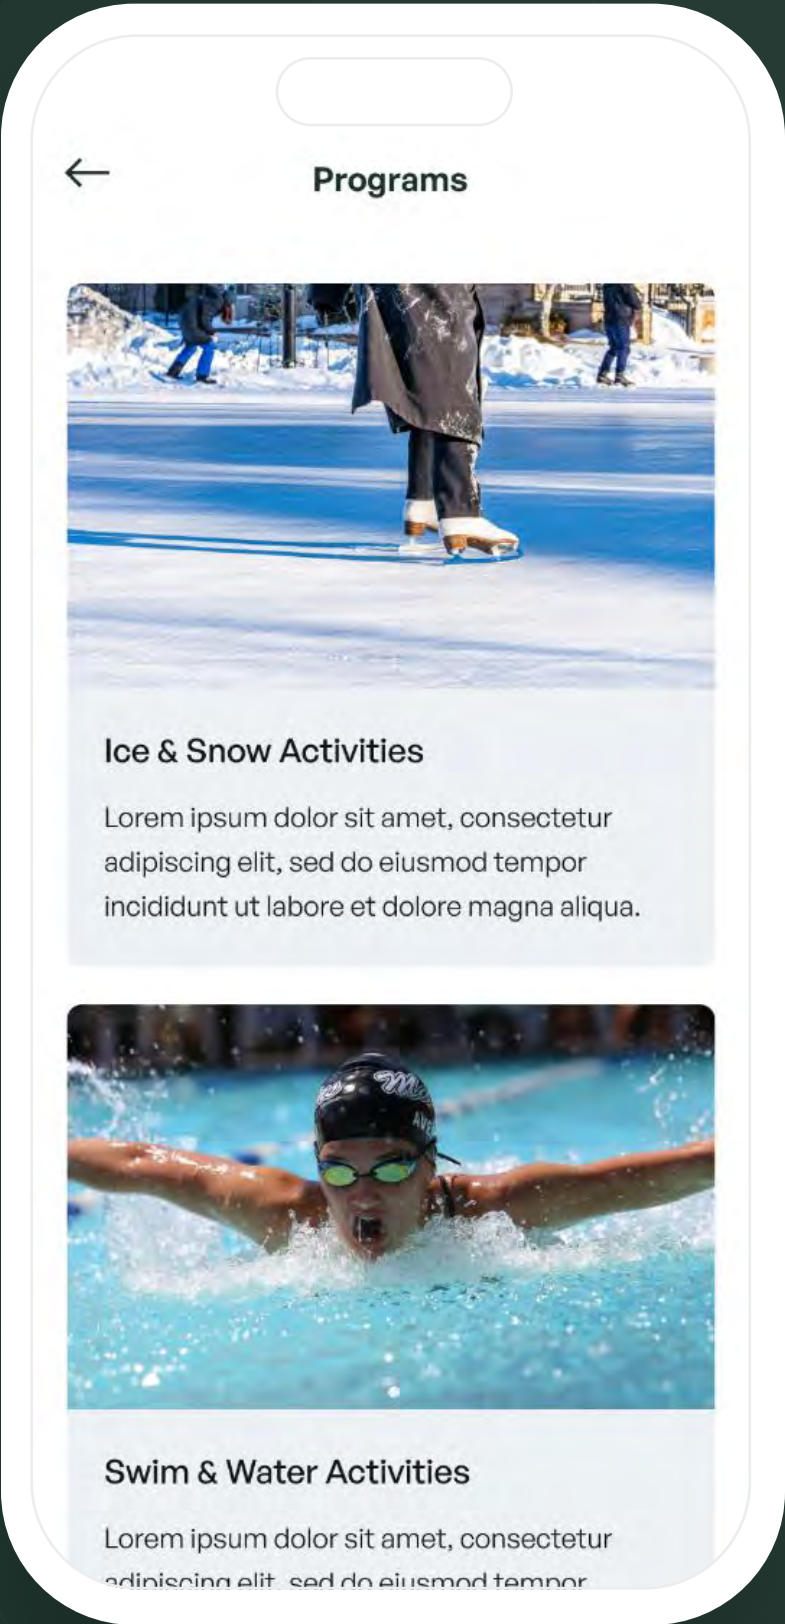

Municipal Services

# Recreation Programs

Residents can access comprehensive information about available recreational activities and programs within the municipality. From sports leagues to fitness classes, this allows residents to easily discover and register for programs that match their interests.

# Do More With A Conversational Interface

 Lookup community center hours of operation

 Report a non-working streetlamp

 Report a stolen bike

 Report a rat infestation

 Pay your municipal taxes

 Report a noise complaint

 Report an abandoned vehicle

 Report graffiti

 Report a building code violation

 Report illegal burning

 Lookup municipal recreation programs

Over **100+** available services to integrate

# Privacy & Security

Muni is committed to protecting the privacy and security of all user data, ensuring that your data is handled with the utmost care and in accordance with the highest standards of data protection.

## Domestic servers (Digital Ocean)

- Personal information
- Address information
- Car information
- Payment information

## OpenAI servers

- Chatbot prompts
- Not used for model training
- Not stored beyond 30 days
- Automatic redaction of sensitive data

# Next Steps

## Phase I

### Onboarding

- System integrations
- Model training
- Staff training

## Phase II

### Launch (2 weeks)

- App Store
- Google Play
- Web

## Phase III

### Maintenance and support (ongoing)

- Maintenance + Support
- Hosting
- GPT

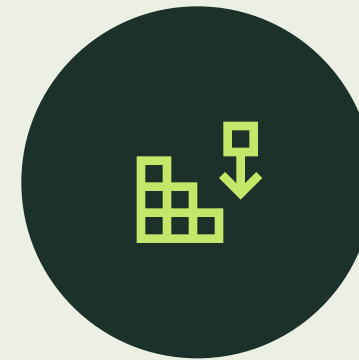

# Pricing

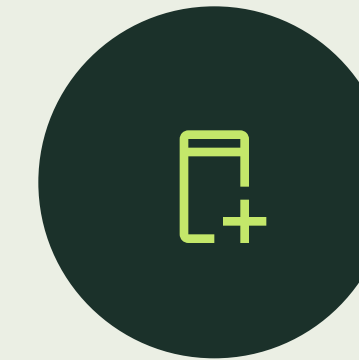

## SaaS Fee

\$24,000 (with 10 admin users) + \$100  
per additional admin user
